Letter of Invitation to the

2nd European Hailworkshop, 19 – 21 April 2017, University of Bern, Switzerland

To whom it may concern

The University of Bern, Institute of Geography and the Oeschger Centre for Climate Change Research OCCR, organize an international workshop on 'Hail Climatology and Risk, Hail Forecasting, Cloud Microphysics, and the Relationship between Hail Probability and Climate Change'. The interdisciplinary workshop will bring together researchers studying different aspects of hail and representatives from insurance, business, and agriculture.

We have formally invited Dr. A. Manzato, as ***speaker and member of the scientific organizing committee*** to the 2nd European Hailworkshop, 19 – 21 June 2014, University of Bern, Switzerland. We have awarded Dr. Manzato a travel grant of 550 Swiss Francs.

Kind regards,

Prof. Dr. Olivia Romppainen-Martius

2nd European Hail Workshop
Oeschger Centre, Falkenplatz 16, CH-3012 Bern

Bern, 21 April 2017

Certificate of Attendance

This is to certify that

Alfredo Nango

has successfully participated in the

2nd European Hail Workshop, 19 – 21 April 2017, University of Bern, Switzerland

The workshop was organized by the Oeschger Centre for Climate Change Research of the University of Bern, Switzerland, in collaboration with the Mobiliar Lab for Natural Risks, the Karlsruhe Institute of Technology (KIT), and the Swiss Federal Offices for Meteorology and Climatology, MeteoSwiss. This three-day workshop brought together researchers studying different aspects of hail as well as representatives from insurances, weather services, agriculture, and other interested sectors. It covered the following topics:

- Nowcasting and forecasting of hail
- Modelling of hail
- The microphysics and dynamics of hail storms
- Local probabilities and long-term statistics of hail
- Convection and hail in a changing climate
- Hail damage and hail damage prevention

Invited speakers gave talks related to these aspects of hail. All participants were invited to present a poster of their own research related to hail.

On behalf of the local Organizing Committee

Peter Stucki
