

Application for ECMWF “Scientist for Machine Learning”.

Dear ECMWF recruitment office, I’m Agostino Manzato from Italy and my main interest is in forecasting convection (thunderstorms, hail, lightning strikes and rainfall) using automatic tools, like machine learning methods.

I do not have a PhD, but if you look at my CV and publication record (attached) you will see that I have gained a lot of experience, thanks to the many conferences, schools and workshops that I was able to follow in the last 24 years.

I kindly ask if in this period of pandemic you would also consider the possibility of smart working.

Best regards!

Gorizia, 28 September 2020

Agostino Manzato
